Softer, Bulkier, Absorbent...

Ellison* Towel collection crafted from **PVA free** pure cotton yarn spun from special spinning technique, resulting towel is soft and fluffy as a conventional zero twist towel. The specially spun yarn has less hairiness so that towel **lints less** thereby increasing towel life and reducing washing machine maintenance.

Special yarn has more open cross section making it softer and fluffier...the towel made from this yarn is comparable to bulk of a conventional zero twist towel which lints more and made from using harmful PVA.

**Ellison yarn can also be made into yarn dyed & piece dyed fashion towels.*

SPECIALIZED
QUALITY

ZERO PVA

LOW LINT

RIGN SPUN YARN

Ring Spun Yarn - hairiness, irregular look, resulting in lint and rough feel

ELLISON PROCESS

ELLISON Spinning Technology - loose fibrils are tucked inside the yarn structure

ELLISON YARN

ELLISON yarn - smooth yarn, better feel negligible loose fibrils, lesser lint.

smose[®]

thirsty • fluffy • wicky

wash after wash

towel of permeable soft cotton
absorbs more, dries faster

BEFORE PROCESSING

- special fibers and cotton fibers blended at pre spinning stage

AFTER PROCESSING

- special fibers melts away at processing stage, leaving spaces in yarn structure

**TOWEL BULKS UP
AFTER EVERY WASH**

Micro spaces created into cotton yarn structure

Open spaces in yarn structure to absorb more water
dries fast as it wicks moisture faster

Low linting and the re-inforced hems for durable towel.

Color Lock keeps colors vibrant wash after wash.

Fade Resistant

Higher Durability

Luxurious

Blooms with wash

Highly Absorbent

High Tensile Strength

Double Needle Seam
